## Summary

2+ YOE in Data Analysis and SWE. Background spanning consumer tech research operations (Apple, Google) and B2B SaaS requirements/quality analysis (QA software startup), with SQL, dashboarding, and A/B testing experience.

## Experience

**QA Wolf** Oct 2025 – Present
***Software QA Engineer*** *Remote*

- Drove **requirements gathering** and translated **acceptance criteria** into structured test plans for product and engineering stakeholders across **12 client SaaS companies** (e.g. Figma, Metronome, DoorDash), scaling coverage to **2,500+ tests per deploy**.
- Spearheaded onboarding of an AI-powered NLP startup, defining **business requirements** and building a **CI/CD** pipeline with hundreds of **Playwright** tests that eliminated the client's need for manual QA.
- Led client-facing scoping sessions to prioritize **test coverage** and reduce flake (false-positive) rates, acting as primary liaison between client stakeholders and the delivery team – directly informing a client's product roadmap.
- Operated within **Agile/Scrum** delivery cycles, documenting **user stories** and process maps through structured written reports (**Loom, Miro, Jira, Linear**) to speed cross-functional issue resolution.
- Investigated CI test suite failures by analyzing concurrency and process regressions, translating technical findings into clear **stakeholder-facing reports** that instilled deploy confidence for high-velocity clients.

**Apple** Apr 2025 – Oct 2025
***Data Analyst*** *(TVC)* *Sunnyvale, CA*

- Designed **study protocols**, participant **eligibility logic**, and subjective measurement scales for a ~900-participant Vision Pro study, aligning research design with **UX Research** and Product stakeholder goals.
- Defined and reported **KPIs** in **Tableau** across 8 concurrent user studies, consolidating product-usage metrics for weekly cross-functional business reviews; gathered requirements from UX and engineering teams to inform testing priorities and logged resulting feature requests in **Jira**.

**Google** Oct 2024 – Apr 2025
***Data Analyst*** *(TVC)* *Mountain View, CA*

- Translated business questions into prototype-testing **product metrics** for Android XR studies, surfacing participant retention drivers via **Looker** dashboards built on **BigQuery SQL**.
- Built structured **SQL** eligibility criteria and segmentation logic supporting 600+ AR data collection studies.
- Automated retroactive data-entry validation and test scheduling workflows via **Google Cloud Platform** integrations, streamlining downstream ML model delivery by a projected 30%.

**UCI Neurocognitive Imaging Lab** Jan 2024 – Jul 2024
***Imaging Analyst*** *Newport Beach, CA*

- Conducted statistical analysis of PET/DTI imaging data using **MATLAB** and **SPM**, documenting methodology and findings used as supporting evidence in a state criminal trial.

## Projects

**Partner Engineering - EDA & Supervised Model** | SQL, R, sklearn, pandas Jan 2024 - Jul 2024

- Defined feature requirements and conducted **cleaning & EDA** on 40 million+ real estate data points; deployed Balanced **Random Forest Classifier** model to predict frame material, winning 3rd place at UCI Expo.

Other Projects: Amazon GPU ETL Pipeline | ICS Search Engine | Climate SQLite DB | MinesweeperAI

## Education

**University of California, Irvine** *Donald Bren School of Information and Computer Sciences*
***B.S. Data Science*** *Sep 2024*

## Certifications

**Google Analytics 4 (GA4) Certification** *Google Skillshop*

## Skills

**Product Analytics**: A/B Testing & Experiment Design • Funnel & Retention Analysis • KPI Definition & Tracking • Event/Tracking Plan Design • Requirements Gathering • Stakeholder Management • Agile/Scrum
**Technical**: SQL • Python • Mixpanel • GA4 • Power BI • Tableau • Looker • BigQuery • Excel • Git • Jira
